BRIDGMAN, MICHIGAN

Boysenberry

THE BERRY SUPREME

A cross of the blackberry, raspberry and loganberry, Boysenberry is far more vigorous than any of its parents. Huge, plump, juicy, delicious berries 1½ to 2 inches long, are borne in profusion. If you could taste them you would agree that in flavor they stand supreme. Whether eaten fresh or with cream, or canned for sauce, jam or preserves, or in pies, it is superior in every way to any other berry grown. Color dark wine-red. Boysenberry is almost seedless; is firm and therefore a good shipping berry. Produced in large clusters on long stems that stand away from the canes.

The plant is a tremendous, vigorous grower, and every cane is simply loaded with fruit. The fruit ripens over a very long period—almost two months. Boysenberry holds the record of almost six tons of berries from one acre, selling for \$1,760.00.

Plant Boysenberry this spring and be the first in your neighborhood to have this wonderful new delicious fruit.

for

\$1.00

Do you dislike having your hands scratched by prickly thorns when harvesting your berries? Thornless Boysenberry is your answer.

This remarkable new berry is identical with the old thorny

Boysenberry in every way except that it ripens ten days earlier and is absolutely free from thorns. The earlier ripening is a great advantage as it gets your berries on the market while prices are higher and that often means a substantial added profit. The berries themselves,

are identical, both in size and flavor, with ordinary Boysenberry but the canes are perfectly smooth, which means great economy and comfort in handling the vines and picking the berries. The supply of plants is limited and the demand enormous so place your order early.

1000

**World's Most Famous Strawberry
Grown For Plants Only on Rich Sandy Soil**

A NATIONAL FAVORITE

Introduced in 1915, Premier soon established itself as the leading early strawberry, and, without doubt, over a period of years it has made more money for Strawberry growers than any other variety ever introduced. A sure indication of its excellence is the fact that newer varieties must surpass it in order to become established. This grand old berry is still ranking at the top of our list in sales.

Attractive Fruit—Heavy Yields

Premier bears an enormous crop of large, uniform-sized berries, while the berry is bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit presents a very pleasing appearance on the market and has an established reputation for top prices. Premier berries are moderately firm and will hold up for local market or shipping reasonable distances.

\$6⁸⁴

Growth

Premier makes an abundant growth for a good fruiting bed, making a plentiful number of nice strong plants rather than great numbers of smaller ones. The plants are sturdy, healthy, and long rooted, making them drought-resistant.

Frost-Proof

Here is where Premier stands supreme. Premier seems to be practically frost-proof and on this account alone it will continue to be grown in many sections for a long time. Not since its introduction has Premier been a total crop failure on account of frost or late freezes.

Heavy-Rooted Plants

Our Premier plants are all grown on rich sandy soil that produces those large thrifty, fibrous root systems that mean vigorous, sure-to-grow plants. Furthermore this sandy soil makes it possible to secure the entire root system when digging the plants. No stubby, broken roots on Rokely's plants.

Choice
Premier

Plant Berries

J. N. Rokely

Not for a long period of time have prospects been so bright for the wide-awake berry grower. The National Defense Plan is creating plentiful employment at high wages enabling workers to purchase freely of fresh fruits at much higher prices. The severe drought of the past summer not only caused severe injury to young plantings of berries but also practically ruined many old fields that would be carried over for future crops. The 1941 berry crop was the shortest in years and the 1942 crop will be still lighter, so there will be no opportunity for either commercial canners or housewives to build up a reserve. This positively means an unprecedented demand for berries during 1942 and succeeding seasons.

The alert grower who realizes this situation will plan to share his share of the profits to be derived from this accumulating demand for berries by planting heavily this spring.

However, due to the unfavorable growing season this past summer, all berry plants are limited in supply. Strawberry plants are especially scarce, there being not to exceed 40% of a normal supply over the country. We, therefore, urge you to make your plans and order your nursery stock early or you may not be able to secure stock when you are ready to plant.

FALL SHIPMENTS

We are unable to make fall shipments of any stock before October 15th to 20th, depending on the season. Our plants are all field grown and do not mature for transplanting until that date. Do not send orders for August and September delivery.

31 Years Experience

Our thirty-one years of success in the catalog nursery business is definite proof that we are supplying our customers with high quality nursery stock at prices that save them money. Our guarantee below is backed by this thirty-one years of experience and we believe you will agree it is as fair as any guarantee that could be written. When ordering your nursery stock, order from a firm with an established reputation for fair dealing.

Our Guarantee

We guarantee all nursery stock sold by us to be first-class, true-to-name, and free from injurious disease. We further guarantee safe arrival of your order by express or parcel post, and will replace free of charge any stock that does not reach you in good growing condition, provided we are notified within 5 days after receipt of shipment. We will also, upon receipt of proper proof, replace or refund the purchase price of any stock that proves untrue to description under which it is sold. However, it is mutually agreed between ourselves and purchaser that we are in no case to be held liable for more than the original purchase price of the stock.

Our stock is carefully handled and full of vitality, and under ordinary conditions should grow for you. But if it does not, owing to the weather and other conditions over which we have no control, we will replace it at one-half the purchase price this fall. Replacement order with remittance must be in our hands not later than October 1, 1942.

Cash Discounts ON EARLY ORDERS

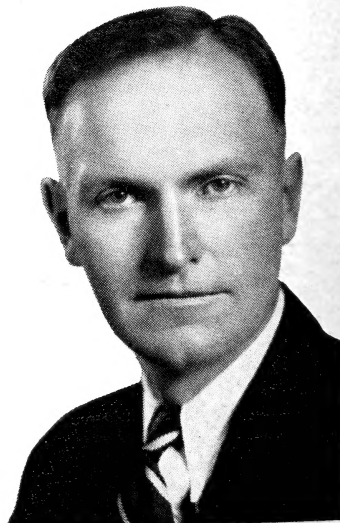

10% DISCOUNT on Cash Orders sent before February 10th, 1942.

8% DISCOUNT on Cash Orders sent between February 10th and March 10th, 1942.

5% DISCOUNT on Cash Orders sent between March 10th and April 1st, 1942.

These Cash Discounts apply only to stock ordered at regular catalog list price, and do not apply to Bargain Collections or special quotations by letter.

If you ask for, and receive, your catalog after February 10th, we will allow you 10 days time to take advantage of the above 10% Cash Discount.

For Quick Profits

Michigan State Department of Agriculture Orchard and Nursery Inspection Certificate of Nursery Inspection No. 674

This is to certify, that J. N. Rokely & Son, Bridgman, has filed affidavit showing that their nursery stock has been inspected and is apparently free from dangerous insects and dangerously contagious tree and plant diseases.

This Certificate to be void after September 15, 1942.

Leo V. Card, Commissioner.

C. A. Boyer, Director,
Orchard and Nursery Inspection.

Lansing, Michigan, October 15, 1941.

Michigan State Department of Agriculture Orchard and Nursery Inspection Certificate of Inspection No. 918

Lansing, Mich., Sept. 19, 1941.

This is to certify that the raspberry fields of J. N. Rokely & Son, Bridgman, have been inspected according to the regulations of this Department, and having been found apparently free from dangerous insects and diseases, this certificate is granted and the sale of plants from the approved fields is authorized for the year ending September 15, 1942.

First Inspection made June 12, 1941: Second Inspection made Sept. 12, 1941.

Leo V. Card, Commissioner.

C. A. Boyer, In Charge of Orchard and Nursery Inspection.

INSTRUCTIONS TO PURCHASERS

ORDER EARLY. Make up your order and send it to us as soon as you receive this catalog. Early in the season we have a complete stock of all varieties and you will not be disappointed in getting just what you want. Early cash buyers will find our Cash Discounts most attractive and worth while.

SHIPPING SEASON. We begin shipping the last of March or first of April, according to season, and continue until about May 15th. We do not advise our customers to order stock for shipment after this date. We can fill fall orders and make shipments soon as stock matures, which is around October 15th, depending on season.

TERMS. Cash with order. However, if you prefer, you may send a small down payment with your order and the balance any time before you wish shipment made. Orders amounting to \$5.00 or more, for shipment before May 1st, will be shipped C. O. D. provided 25 per cent of the amount is remitted with order. No orders will be booked or stock reserved unless part payment is made with order.

REMITTANCE. Always remit by personal check, express or post office money order, bank draft, or registered letter. Never send currency in letter without registering,

as we cannot assume liability for currency lost in unregistered letters.

NOTE. Should the United States, or any state, increase by taxes, legislative acts, inflation, or in any other way beyond our control, the cost or selling price of nursery stock listed in this catalog, we reserve the right to add to our quoted prices to cover such increase.

EXPRESS SHIPMENTS. For most orders express is the safest, and, all things considered, the best way to have your nursery stock shipped. All express orders are shipped collect for transportation charges. All shipments of nursery stock by express now travel at second class rate, making charges about 25 per cent cheaper than formerly.

PARCEL POST SHIPMENTS. Many of our small orders are shipped by parcel post but we do not recommend it for any but very small orders, as it is much more expensive than express on large orders or for long distances. By referring to the table below you may determine the amount of money you must add to your order for postage. If postage is not included with your remittance we will assume that you wish us to ship C. O. D. for exact postage required.

Catskill

**MIDSEASON OFFSPRING
OF PREMIER**

This giant, flashing red new berry has taken the strawberry world by storm. A cross of the Marshall and Premier, it has proven by far the best and heaviest yielding midseason strawberry ever introduced.

High Quality—Long Season

In quality Catskill berries are good, fully as good as Premier, and are very firm, making excellent shippers. The bright green cap, enormous size, flashing color and showiness make it sell well in any market. Although Catskill starts ripening about midseason, the crop is so large and borne over such a long period, that some growers are using it for both midseason and late. Catskill plants are large, long-rooted, vigorous growers, enabling them to mature the enormous crop of berries even under adverse conditions. Profit by the experience of others—grow Rokely's Catskill for profit!

Grand Champion

This new long season berry commences to ripen with the Premier and still produces fancy berries with the Aroma. Extremely heavy yields of immense, bright red berries with enticing rich flavor and fancy appearance. Plants are large and sturdy with extra heavy healthy foliage which protects the blossoms from frost. Grand Champion is rapidly making a name for itself because of its heavy yield of extra fancy berries that top the market.

DORSETT

Dorsett has that delicious, rich dessert flavor that places it above all others excepting Fairfax, making it a prime favorite for home gardens. Berries are bright, snappy red, large and perfectly formed, ripen evenly and are firm throughout. They stay bright and firm several days after picked. Dorsett is an early strawberry that produces enormous loads of perfect fruit. Plants are hardy and thrifty growers that make heavy picking rows. Will stand up and produce under both very dry and extremely wet conditions. Yields of 10,000 to 12,000 quarts per acre are often reported—you can do as well!

FAIRFAX

"The very top of the list for quality" that's what everyone says who has tried this wonderful dessert strawberry. Ripening early. Fairfax berries are larger than Premier and are a deep, full red. Big, round, juicy fruit with a rich, distinctive strawberry flavor equalled by no other variety. Fairfax is enormously productive and very firm. Plants are big long-rooted fellows, exceptionally free from disease and vigorous in growth.

Blakemore

Yellows-Free **Blakemore**

Extra Early! Firm! Productive!

Blakemore had only one fault, and this has been removed by the Yellows-Free Strain. You need no longer worry about your Blakemore plantings due to Yellows. Our Yellows-Resistant Strain of Blakemore was secured through the United States Department of Agriculture in the spring of 1938 and during three growing seasons here in our nursery the plants of this new type Blakemore have not shown a single plant of the Yellows Disease.

Blakemore berries are bright red, with tough skin, firm flesh, and a high-spirited, tart flavor. In shape, slightly blunted at the point, conical, with broad shoulders. Its bright green cap curls upward when the

fruit ripens, making it easy to pick and hull. Ripens extra early and bears enormous crops of large berries.

Due to its firm flesh and tough skin, Blakemore has proven a wonderful long distance shipper. It will not become soft during hot, moist weather and will stand rough handling without bleeding. Retains its bright red color long after picking. Plants are hardy, vigorous, and produce runners freely. Will thrive on the poorer soils and stand extreme weather conditions.

DUNLAP—Old Favorite **\$4⁹⁵**

If you love shortcake, you will surely appreciate one made with Dunlap. Probably the oldest strawberry grown but still one of our best sellers, proving that it is one of the best all-purpose berries ever offered. It produces wonderfully large crops of beautiful, crimson-red berries with a rich, distinctive flavor that makes them favorites for home use. Dunlap makes a profuse plant growth, and is so healthy and hardy that it does well in all sections of the country. The plants are medium in size, hardy, long-rooted, very prolific, and will hold their own under most any rough and tumble methods of cultivation.

GEM \$145 ^{per} 100

Everbearing

Gem is rapidly taking first place among all fall-bearing strawberries and is equalling many standard, or June-bearing varieties in the early summer yield. The plants are healthy, hardy, drought-resistant, easily grown, and productive. Gem berries are all large, bright sparkling red, ripen evenly, and have wonderful eating and wonderful marketing qualities. Gem will commence bearing in 90 days after planting and continue until severe freezing weather, giving you fresh strawberries this summer and fall. Next year they will bear spring, summer and fall. A few Rokely's Gem in your garden will give you quantities of berries for the table and commercial planting will bring large profits the same summer.

MASTODON

EVERBEARING

The most widely grown ever-bearing Strawberry—planted all over America. For many years now this fine variety has proven its worth. It will start bearing 90 days after planting and provide fresh strawberries all summer and fall. Our strain produces extra large berries of good flavor and bright red color. Planted this spring, Mastodon will bear loads of big, luscious berries this summer and fall. Next year they will bear spring, summer and fall. Large strong plants enable this variety to outbear and outgrow other less vigorous kinds.

Our Giant Mastodon plants are all grown on a special water-bottom, fertile, sand soil that produces those long, fibrous, white-rooted and big-crowned plants so much desired by the planters. Plant Rokely's Mastodon at these new low prices!

Cumberland

The Business Blackcap

No Blackcap has ever been grown as extensively as Cumberland, nor attained its great popularity in all producing sections of the country. Cumberland plants are healthy, vigorous growers, throwing up stout, stocky, well-branched canes that produce immense crops of wonderful berries. Fruit is uniformly large and brilliant purplish black in color. Berries grow in big, attractive clusters. Easy to pick and easy to sell, for their beauty and luscious flavor attract buyers. Cumberland has every quality you want. A famous canner; superb for the table. Stands up for long distance shipping. A real money maker. Ripens medium-late, following Logan and furnishing a fine fruiting team with this popular variety. If you want only one Blackcap, and are not familiar with varieties, choose Cumberland.

New

LOGAN

\$2.55

Black Raspberry

Disease-Resistant Blackcap
EARLY

New Logan is now the leading early Blackcap in all sections where Blackcaps are grown. Originated in Ohio and perfectly hardy in all climates. Ripens 7 to 10 days earlier than the Cumberland which allows the grower to get in on the early market when prices are high. The New Logan produces immense crops of jet black berries, as large as Cumberland. Does not crumble and the last picking looks as nice as the first. Withstands severe weather conditions. Grows fast into strong, sturdy bushes that are great drought resisters. New Logan is an enormous and dependable yielder, ranking with Cumberland in most localities and out-yielding this famous variety in many sections of the country. The berries are borne in immense clusters, making them easy to harvest. Covers a long fruiting period, reaching well into the Cumberland season. Bushes are practically immune from mosaic and other Raspberry diseases. With New Logan for early and Cumberland for late you will have a team that can't be beaten for yield and profit.

New! Black Raspberry MORRISON

The Largest Blackcap Grown!

8 for \$1⁰⁰

Heretofore Cumberland has been rated one of the largest Blackcaps grown but the new Morrison exceeds even the Cumberland in size, many of the berries approaching one inch in diameter.

This valuable new berry was found growing wild by County Agent Paul Croosman of Erie County, Penna., who was attracted by its large size and jet-black color. The bushes are vigorous growers, hardy, and remarkably free from disease. The enormous berries are shiny jet-black in color, of the Cumberland type, and grow in big attractive clusters. The Morrison sells on sight as the large size and snappy appearance attract buyers—the luscious flavor brings them back for more.

Morrison plants are very limited in supply so we urge early ordering. Be the first in your

Morrison

neighborhood to have this wonderful new Blackcap!

Sodas

SODUS

The most promising Purple Raspberry so far. The berries are much larger than any blackcap or red raspberry, firm and attractive, and do not crumble. Resemble red raspberries in shape and appearance, but grow like blackcaps. Fruit is dark reddish purple, very beautiful and appetizing. Much superior to the Columbian which was one of the best. Plants are vigorous, hardy and very productive, and so far have shown no signs of disease. Sodus is the result of a cross between Dundee black raspberry and Newburgh red raspberry. You will like its unique flavor. Try it!

**ROKELY'S
HEAVY
YIELDING**

Latham

WORLD'S GREATEST LATE RASPBERRY

By sheer pre-eminent merit Latham has become in a few short years the most popular Red Raspberry in the United States today. Popular in the home garden because it is easy to grow and sure to bear. Popular with

berry growers because it makes them money, is a sure and heavy cropper, and the fruit carries well to market and commands a premium.

IMMENSE BERRIES— SUPREME QUALITY

Latham berries are mammoth, bright red beauties averaging three-fourths to one inch in diameter. Uniform in size and shape and present a delightful picture. Supreme in quality, the berries will cling to the bushes several days after ripening and never crumble. Sells at premium prices on all markets.

HARDY—HEAVY YIELDER

Latham is a strong, sturdy grower. Absolutely hardy and the Rokely strain is absolutely free from disease. It thrives on every kind of soil and produces bumper crops of fine berries regularly. The canes grow large, straight and tall and are literally loaded with berries which mature perfectly over an unusually long fruiting season.

\$17⁹⁵

per

1000

EXTRA HEAVY LATHAM PLANTS

We especially invite your attention to our extra Heavy 1 yr. grade of Latham. This grade is made up of plants with extra heavy top and root development and these plants will come into full bearing much earlier than the regular 1 yr. grade. Some firms offer this size as "1 yr. Bearing Size." We highly recommend this "Extra Heavy" grade as results received will be worth many times the slight additional cost.

Plants Double Inspected

All our raspberry fields are inspected twice during the summer growing season by Michigan State Inspectors. These men are especially trained for this work and their O. K. is your assurance of disease-free stock. Note copy of our Certificate of Raspberry Inspection on Page 5 of this book.

ST. REGIS

Everbearing Red

St. Regis is the best known fall-bearing Red Raspberry. It ripens extra early and produces a big crop during the regular raspberry season, then continues to bear throughout the summer and fall months. Will commence bearing in September after planting. Berries are medium to large in size and a brilliant crimson color. Flavor is rich and sweet, with good keeping qualities, making it a splendid shipper.

Best New Late Red

A newcomer, originated by the New York Experiment station where it was reported as the best late variety on trial. Berries are very large and the size holds up well throughout a long season. The color is a bright, attractive red, shape long, conic. Firm, free from crumbling, have small cavity, and are uniform in size. The plants are tall, vigorous, hardy, and produce heavy crops. Ripening season about with Latham.

Taylor is recommended as being very promising by growers who have tested it. We believe it to be a really fine new variety and are sure you will make no mistake in planting it now.

INDIAN SUMMER

New Everbearing Red 25 for **\$1⁰⁰**

The earliest to ripen in the spring, again bearing another crop of berries in the late summer and fall. Outclasses all other everbearing raspberries in appearance, flavor, and size. Fine, large, delicious, medium red berries borne on hardy, vigorous bushes of medium height. Indian Summer ranks with the best for its regular summer crop and produces more, and better quality berries in the fall than any other Everbearers. We highly recommend Indian Summer for commercial plantings or home gardens.

Plants Required to Set An Acre

	No Plants	
	Distance Apart	Per Acre
Strawberry (commercial)	4 ft.x18 in.	7,000
Strawberry (Garden)	2½ ft.x1½ ft.	11,600
Black Raspberry	7 ft.x4 ft.	1,550
Red Raspberry	6 ft.x3 ft.	2,400
Blackberry—Boysenberry	8 ft.x4 ft.	1,350
Dewberry	6 ft.x4 ft.	1,800
Grape	8 ft.x10 ft.	550
Asparagus	4 ft.x18 in.	7,000
Rhubarb	4 ft.x4 ft.	2,700

Spacing Distance for Fruit Trees

	No Plants	
	Distance Apart	Per Acre
Apple	35 ft.x35 ft.	35
Peach	15 ft.x15 ft.	193
Pear	20 ft.x20 ft.	108
Sour Cherry	15 ft.x15 ft.	193
Sweet Cherry	20 ft.x20 ft.	108
Plum	20 ft.x20 ft.	108
Apricot	15 ft.x15 ft.	193

If you prefer to plant other distances than those listed, here is a simple rule to determine the number of plants required for an acre. Multiply the distance between rows, in feet, by the distance between plants in the row in feet. This will give the number of square feet required for one plant. Divide this into 43,560 the number of square feet in an acre, and the result will be the number of plants you will need for one acre of ground.

Alfred

ALFRED

The Coreless Early Blackberry

25 PLANTS 55c

Alfred is a big producer of large, jet black plump berries, many of them 1½ to 2 inches long. Practically free from seeds, coreless, sweet and juicy.

Alfred ripens a week to ten days earlier than Eldorado, producing a heavy crop of fruit. A healthy, vigorous grower and bears nearly a full crop the year after planting. Absolutely hardy and will withstand temperatures of 30 degrees below zero. Favorite early market blackberry and superb for serving fresh, canned or in pies.

Eldorado \$16⁹⁵ per 1000

King of Commercial Blackberries

The very finest commercial blackberry on the market. Eldorado berries are large as your thumb, jet-black, borne in large clusters and ripen well together. They are sweet and melting with that delicious aroma and flavor which can be found only in a wild blackberry. The berries are very firm and will remain in good condition for four to six days after picking. They will also retain their rich glossy color until consumed, never turning red like the ordinary blackberry. No hard core, making them the choice of both canner and housewife.

The bushes are free from disease and immune to orange rust. The canes are vigorous and their yield of fruit is enormous. We have never known it to winter-kill or fail to produce an exceptionally fine crop of fruit.

Rokely's Eldorado plants are the healthiest, hardiest, and heaviest yielding strain on the market. Plant the best, they cost no more.

PARADISE

The Asparagus of Tomorrow

25
for
90c

This new Asparagus, recently introduced, is so far superior to older kinds that we predict it will soon replace all others. A prolific yielder, it produces stalks of enormous size, yet tender and juicy, with a rich mild flavor superior to other kinds. Has proven highly rust resistant and is easy to grow. Our stock of Paradise is very limited but we urge you to make at least a small trial planting.

PRICES: 1-yr. No. 1 roots: 12 for 50c; 25 for 90c; 50 for \$1.50; 100 for \$2.40.

MARY WASHINGTON ASPARAGUS

Rust-Resisting

We offer you Mary Washington, which is the best of the Washington strains developed by the United States Department of Agriculture in their search for a rust-resistant variety. Our plants are grown from certified strain seed, on a rich sandy soil that produces long, white roots and heavy crowns. Don't buy ordinary asparagus when you can get **Mary Washington** for the same money.

ROKELY'S GIANT

RED RUBY

3 for \$1⁰⁰ Rhubarb

STALKS RED TO THE CENTER

This new Red Rhubarb, introduced from Canada, is the best of all. The stalks are unusually large and intensely red as the name implies—even the inside of the stalk is red. Rhubarb sauce made from Ruby is as red as strawberry sauce. Stalks are very tender and juicy—not tough or stringy as most large stalks are and the skin is so tender it can be cooked with the stalk. Ruby yields heavily over a long season and one planting will last for years. Ruby is a real money-maker on the market because it sells on sight at a premium over common Rhubarb.

Ours are all strong division roots ready to produce quickly.

Fredonia

THREE WEEKS EARLIER THAN CONCORD

Fredonia is the earliest good black grape. A recent introduction of the New York Experiment Station, it is rapidly replacing the older standards varieties of early grapes.

The vine is vigorous and productive and ripens its fruit three weeks earlier than Concord. The clusters are medium in size, cylindrical and very compact; berries large, round, and hang well to the bunch. The skin is thick and tough, and the flesh is juicy, solid, but tender. The quality is extra good, being equal to or better than Concord.

Portland NEW EARLY WHITE

Another introduction of the New York Experiment Station. Resembles Niagara in shape of berry and bunch but ripens three weeks earlier. Bears young, heavily, and regularly. The fruit is large, rich and sugary, with a spicy flavor you certainly will like. Absolutely hardy. A real find for the commercial grower and a treat for the home gardener.

CONCORD

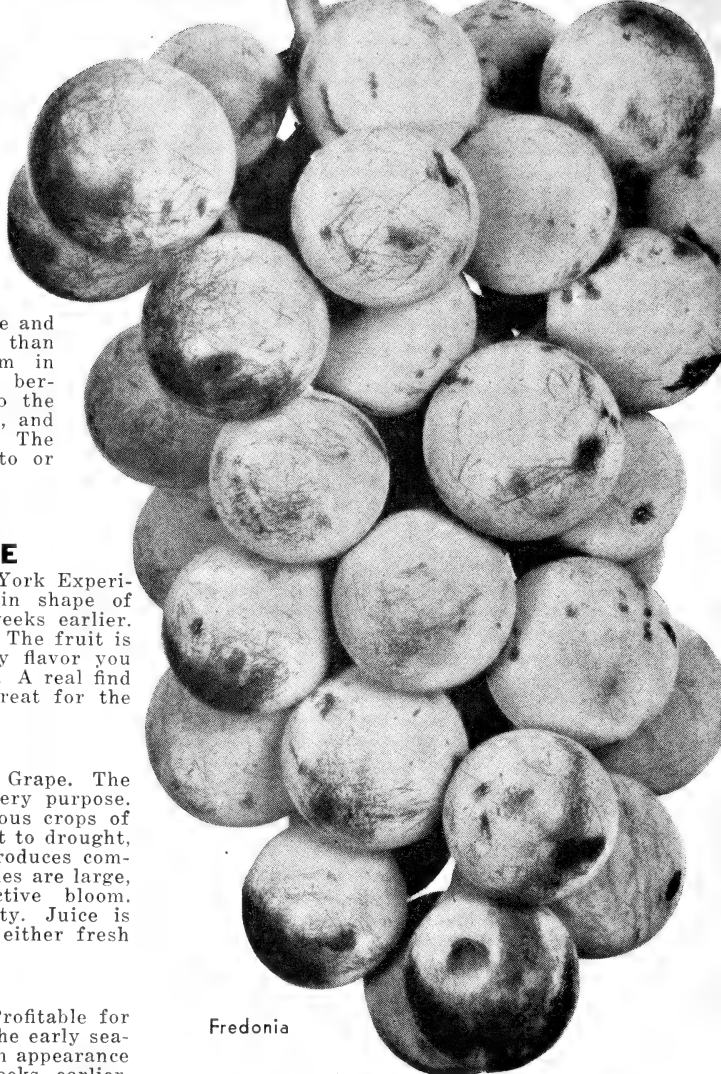

(Black)

America's leading wine and table Grape. The only variety that is supreme for every purpose. Grows on all soils, producing enormous crops of highest quality fruit. Highly resistant to drought, insects and diseases. Very hardy. Produces compact bunches 5 to 7 inches long. Berries are large, bluish black, covered with attractive bloom. Highest keeping and shipping quality. Juice is rich wine-purple and very delicious either fresh or canned.

MOORE'S EARLY

(Black)

A heavy-producing early variety. Profitable for commercial growing because it gets the early season high prices. Similar to Concord in appearance and quality, ripening about two weeks earlier. Has a peculiar sweet flavor that makes it an excellent table Grape.

Fredonia

NIAGARA

(White)

The leading commercial white Grape. More productive than other standard white varieties. The quality of Niagara compares with Concord, being superb for home use or shipping. Bunches are large and compact, berries large and of attractive appearance. In great demand as a table and wine Grape.

CACO

(Red)

We consider this the most beautiful and the best hardy red Grape. The fruit is wine-red in color, very large, rich and sugary, with a delicious melting flavor. Caco is hardy, a vigorous grower, and bears young, heavily and regularly. Leading horticulturists and experiment stations claim it has no equal as a variety for home use. Always in demand on all markets at extra fancy prices.

Jonathan

DELICIOUS, DARK RED. Grand Champion of winter apples. Red with pin dots of yellow. Fine grained, crisp, juicy, with mild, pleasant flavor. Ranks first both for commercial and home orchards. Tree hardy, vigorous grower, producing enormous annual yields.

NEW DOLGO CRAB. Brightest, most dazzling red color of any apple. Draws crowds of admirers at fair exhibits! Good to eat fresh. A few Dolgo make lots of bright red jelly as they tell the quickest of any apple. Tree hardy, vigorous, productive, young bearer, and splendid ornamental shade tree.

JONATHAN, DARK RED. Grand, good winter apple. Bright, solid red. Flesh white, firm, fine, crisp and tender—a splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. Excellent keeping qualities.

McINTOSH DARK RED. One of the most important fall and early winter varieties. An exceptionally fine eating apple, of good size, bright red color, and a delicious aromatic flavor. Hardy trees which start bearing heavily while still young, and thrive on poor soils.

NORTHERN SPY. Extra large, greenish yellow winter apple with red markings. Highly flavored, excellent for eating, cooking and storage. Tree hardy and productive.

STAYMAN WINESAP DARK RED. Late fall apple with rich enticing flavor. White, juicy flesh; excellent for eating or market. Good keeper and heavy producer. Succeeds everywhere.

WEALTHY. The most dependable and widely planted fall apple. Large, round, bright red striped yellow. Flesh white, tender and subacid. Hardy and a free grower. A valuable market sort.

YELLOW TRANSPARENT. No orchard should be without a few of these delicious golden yellow apples. Good to eat long before other varieties are ready. Fruit large yellow with crisp meat and delicious flavor. Makes fine sauce or pie. Covers long fruiting season. Trees vigorous and very productive.

YELLOW DELICIOUS. Acclaimed by many as the best flavored apple in the world. Not so large as the Red Delicious, but has the same distinctive shape and an added deliciousness in flavor. Crisp, white, juicy flesh; firm skin; good shipper and storage sort. Hardy, bears young, and is a regular and heavy bearer.

Hardy Northern-Grown PEACH TREES

HALE-HAVEN

Hale-Haven has the large size of the J. H. Hale along with the productiveness and high quality of the South Haven. It is a fancy freestone variety that ripens ten days earlier than Elberta. In color a deep snappy yellow, with a reddish tinted cheek. Flesh is yellow, rich, firm, and juicy. Hale-Haven is very hardy, a remarkably fast grower and an exceptionally heavy producer. This marvelous peach looks better, keeps better and even tastes better than any other you have ever grown.

GOLDEN JUBILEE

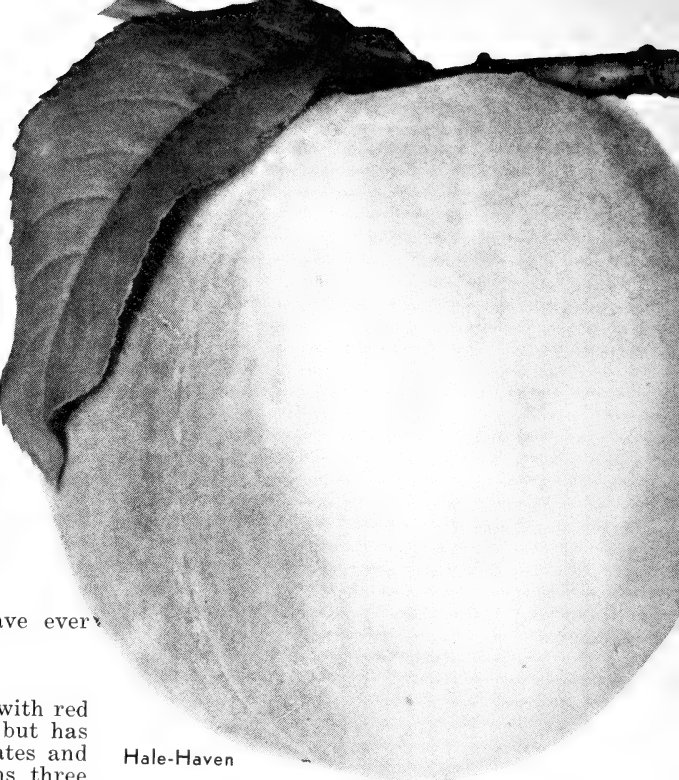

This enormous golden yellow Peach with red blush was introduced in New Jersey, but has been thoroughly tested in northern states and found as hardy as Elberta. It ripens three weeks earlier than Elberta and is of better quality. The skin is yellow blushed with red; flesh yellow, juicy, tender and sweet. Freestone. One of the best shipping varieties on the market.

ELBERTA

The standard market Peach of the country. A valuable large Peach of good quality; yellow with red cheek, juicy and highly flavored. Flesh yellow; freestone. Ripens midseason.

SOUTH HAVEN

Exceptionally fine flavor. Flesh yellow and sweet. Its showy exterior combined with its earliness makes it a real money-maker. Ripens ten to fourteen days before Elberta. Trees are hardy, quick growing, and bear heavily and young. Freestone.

Hale-Haven

ORANGE QUINCE

The best of all Quinces. Excellent for jelly and preserves. Fruit large, bright yellow, excellent flavor. Heavy annual bearer. Will stand quite damp ground.

PRICES, 2-yr. 4-6 ft. trees: Each 75c; 3 for \$2.00.

CHAMPION

The very best early white-fleshed freestone. Rich and juicy. Highly colored cheek. A favorite eating Peach. Ripens in August.

SURE CROP NECTARINES

Fruits are large as Peaches, rounded, golden orange with blazing red blushes. Entirely fuzzless. Flesh is firm, tender, freestone. Strikingly beautiful and richly flavored, combining Peach and Apricot flavors. Trees hardy as peaches and easy to grow.

PRICES, 2-yr. 4 to 6 ft. trees: Each 75c; 3 for \$2.00.

Cherry Trees

SOUR CHERRIES

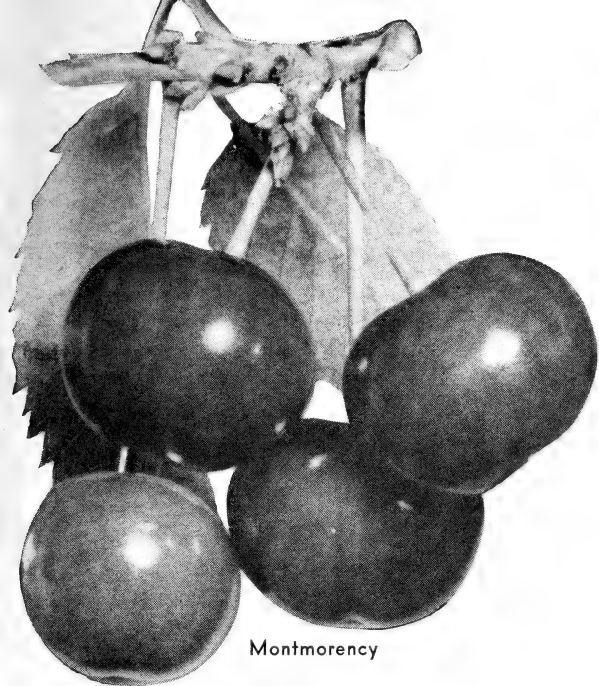

EARLY RICHMOND. Best early cherry, much like Montmorency, except a trifle smaller and slightly more acid. Bright red and juicy. Heavy bearer.

MONTMORENCY. Large, late, heavy cropper of dark red cherries. Thick meat-ed and juicy, yet the best shipper known. Size and flavor make it the leader everywhere. A sure bearer under any ordinary conditions.

STANLEY PRUNE

A new hybrid between a new prune and the giant Grand Duke Plum. A good cropper, it has already become popular both as a com-mercial item, and in the home orchard. Of large plump size in typical elongated prune form; dark blue with a thick bloom. The flesh is fine grained and juicy, sweet, and of extremely pleasant flavor to eat from the hand. For canning, it requires only about half the usual amount of sugar. Firm and does not crack. Produces heavy crop every year; often bears in three years.

PRICES, 2 yr. 4-6 ft. Trees: Each 75c; 3 for \$2.10; 10 for \$6.50.

Stanley Prune

Bartlett
Pear

PEAR TREES

BARTLETT. Leading commercial and home use pear. Big producer. Fruit is golden colored, sometimes with red cheek. Flavor melting rich and buttery. Good for any and every use. Ripens about first of September.

CLAPP'S FAVORITE. Ripens early August. Large pale yellow pear with red cheek. Tree hardy and vigorous and does well everywhere. Fruit fine grained, sweet, and highly flavored.

KIEFFER. Ripens in October and November. Large yellow pear noted for its keeping quality. Used extensively in commercial plantings because of its sure crop, heavy yield and shipping qualities. Tree very fast growing and bears young.

SECKEL. Commonly called "Sugar Pear." One of the richest and highest flavored pears known. Small size, yellowish russet, with red cheek. Flesh white, buttery, very juicy and melting. Always in demand for desserts and better known than any other pear in its class. Ripens September and October.

NEW DOUGLAS PEAR

Bears in Two Years

This valuable new early-bearing pear is cold resistant and considered to be blight proof. Bears early, oftentimes same season planted and produces heavy crops. Fruit is large, smooth, yellow blushed. Flavor delicious, very sweet, melting and juicy. A regular cropper in all soils and localities. Something new and better!

PRICE: 2-yr., 4-6 ft. trees, Each 65c; 3 for \$1.80; 10 for \$5.50.

HANSEN'S HARDY APRICOT

WILL STAND 50 BELOW ZERO

This new Hardy Apricot was originated by Prof. Hansen, of South Dakota State College, from seed collected in East Siberia. Two outstanding points of this new Apricot is its extreme drought resistance and extreme hardiness. Heat and drought or the other extreme, 50 below zero, does not interfere with its vigorous growth and heavy crops. Bears heavy crop of large yellow fruit. No. 1 in size and quality. Cooks up into rich yellow, good quality sauce. May be planted any place in the United States.

PRICE: 4 to 6 ft. trees; Each, 85c; 3 for \$2.40; 10 for \$7.50.

Hansen's Bush Cherry

Ornamental Shrub Valuable Fruit

Shapely, ornamental shrub, with long pointed gray-green leaves, silvery beneath. Covered with snow-white flowers in spring. Cherries are in large clusters easy to pick. The fruit is large, sweet, shaped like a plum and as delicious as sweet cherries to eat out of hand. Makes excellent jelly, jam and juice. The bushes reach a height of four to five feet and are perfectly hardy everywhere. Produce an enormous crop in your garden or along the edge of the yard. You will find them most beautiful and enjoyable.

PRICE: 2 to 3 ft. bushes, each 40c; 3 for \$1.00; 10 for \$2.50; 25 for \$5.00.

Dresden

NEW! EARLY!

\$1.45
per
100

This new early variety is making new records for productiveness. Introduced by the New York Experiment Station at Geneva, New York, Dresden is certainly a berry for the North and in test plots has produced as much as 10% to 20% more quarts per acre than even Premier. Premier is one of the parents of this new variety and Dresden seems to have taken the high producing ability of Premier and added to it.

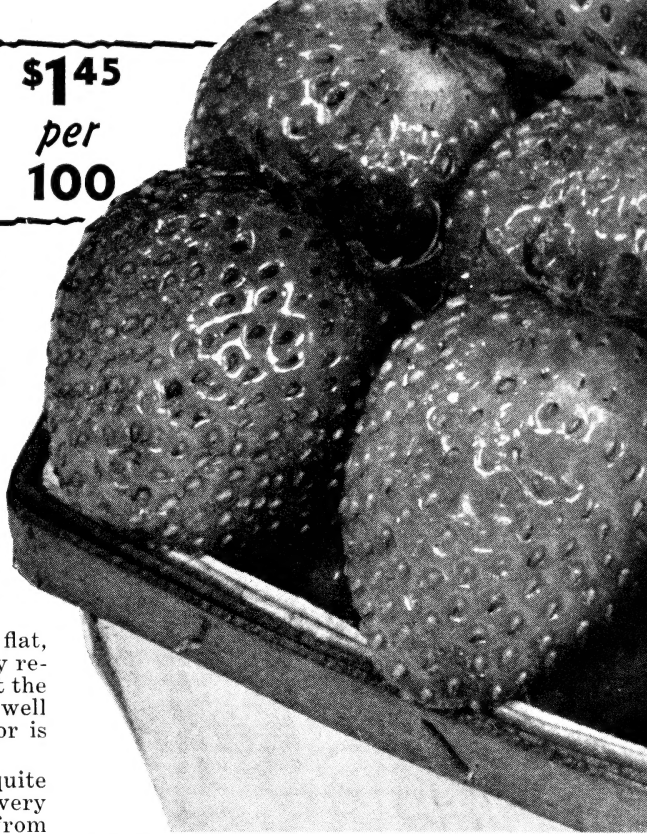

The fruit is large and very similar to Catskill in shape; the first berries are usually somewhat rough and irregular, mostly flat, wedge shape, a light even red, with slightly receding seeds. The flesh is medium firm, but the skin tough, and it should stand shipping as well or better than Premier. Quality and flavor is good but not outstanding.

Dresden makes new runner plants quite freely, making a good fruiting row of very large crowned plants, vigorous and free from disease. Starts blooming very early and usually continues for a week or ten days. Like Premier it will not suffer severe injury from late frosts.

Dresden is a fine addition to the present strawberry varieties and we are confident it will soon be as widely planted and as popular as Catskill. A true leader in Size, Beauty, and Productiveness.

Special Ameliamums Offer

12 plants in 4 colors

3 Pink 3 White
3 Bronze 3 Red

All 12 plants for only

\$1.75

AMELIAMUMS

These Ameliamums, often called "Cushion Mums," grow in one season into a beautiful "Ball of Blooms" from 2 to 3 ft. in diameter, from the plants we send you this spring. They begin to bloom in mid-August and continue until freezing weather.

PINK AMELIAMUMS—Double pink blooms 2 to 3 in. across, changing to lavender-pink. Each 25c; 3 for 55c.

BRONZE AMELIAMUMS—Deep golden bronze, changing to lighter shade. One of the best. Each 30c; 3 for 60c.

WHITE AMELIAMUMS—Pure white with pink tinge on outer fringe in late season. Solid ball of white when in full bloom. Each 25c; 3 for 55c.

RED AMELIAMUMS—More dwarfish than above three. Blooms smaller, dark red, yellow centers. Each 35c; 3 for 70c.

Grow CULTIVATED BLUEBERRIES

These giant, cultivated blueberries are the result of scientific breeding by state experiment stations and are far superior to the ordinary wild blueberries. Bushes grow to a height of 6 to 8 feet and bear enormous loads of large, luscious berries of highest quality and most delicious sweet flavor. Two to six bushes in your garden will furnish your family plenty of berries for fresh pies and canning. Highly profitable when grown for market as these large, fresh blueberries will bring 50c to 75c per quart on the wholesale market.

In order to thrive, blueberries require an acid soil with abundant moisture. If your soil is not acid it may be made so by mixing with a liberal quantity of acid peat, rotted leaves, pine needles, sawdust, or similar material.

Ripen from early July to late August. Once planted, bushes last a lifetime and require no unusual care.

2
for
\$1.25

ADAMS—Early, large sweet berries. Upright bush.

HARDING—Longest season of all. Begins to ripen early midseason and is the last one to ripen berries. Spreading bush. High quality, sweet berries.

RUBEL—Hardy, late, upright bush. Most widely planted of all. Enormous producer of medium to large berries of good quality.
